

Your Blueprint for the Future of Construction Software

The [StruXure.co](#) platform is the most contractor-centric construction software in the world. It provides full-lifecycle solutions, connecting all project stakeholders and enabling access to cutting-edge technology. Our platform augments human intelligence by automating repetitive tasks, helping you find the signal through the noise and allowing you to make data-driven decisions with intuitive visualizations and best-in-class user experience (UX). Leverage software that adapts to your workflow, not the other way around.

Submittals & Specifications

Generate submittal logs and manage specifications with ease. StruXure.co eliminates uncertainty by providing a single point of record and full visibility into the status of every submittal. You can assign approvers, set deadlines, and track real-time progress using the activity feed, ensuring everyone knows who needs to act next to keep the project moving.

Drawing & Plan Management

StruXure.co uses intelligent OCR to automatically split, label, and organize plans instantly, eliminating hours of manual effort. Ensure everyone always has the latest version and avoid mistakes by viewing design evolution with intuitive overlays.

Request for Information (RFIs)

Manage Requests for Information (RFIs) effortlessly from field to office. StruXure.co allows you to create, distribute, track, and follow-up on every request to prevent costly delays. Align teams and reduce errors with automated distribution lists, promote transparency with accessible history, and streamline responses via intuitive, email-based communication.

Schedule

Keep your project on track from start to finish. StruXure.co centralizes your schedule in one place, with seamless import / export to industry-standard tools like Microsoft Project and Primavera (P6). Quickly toggle between milestones, tasks, and critical path. Visualize progress with intuitive Gantt charts, calendars, or task lists. Ensure every team member and trade partner is working from the latest version, so nothing falls through the cracks.

Subcontracts & Purchase Orders

Manage all project expenses accurately against CSI and cost codes for robust financial reporting. Stop financing client work by ensuring you get paid on time. Easily build your Pay Applications (Pay Apps) sequentially from your schedule of values, manage your continuation page, and generate professional PDFs for payment submission.

Prime & Contract Management

Manage your Prime contract, subcontracts, and purchase orders seamlessly in one place. Track your budget by CSI code and build your schedule of values. Set essential logic (like retainage and taxes), track subcontractor insurance coverage, and efficiently manage all Change Orders (OCOs, COs, CCOs).

Direct Accounting Integration

StruXure.co leverages a robust integration with Sage Intacct to deliver seamless construction and financial management. This end-to-end integration automatically synchronizes projects, contracts, budgets, and change orders in real-time. By eliminating manual data entry and providing a single source of truth, StruXure.co ensures operational decisions instantly reflect in your financials, accelerating accurate decision-making.
